## SERVICE OVERVIEW

### Asset Pickup & Removal

Free and secure asset pickup and removal. At the time of pick up, once loading is complete, a Transfer of Ownership will occur and assets will be transported to our secure facility.

### Asset Tag Removal

PCs for People protects the identity of its recycling partners by removing all identifying labels from equipment that is collected, including asset tags, logos, and all other identifiable branding.

### Secure Drive Removal & Data Sanitization

In our secure process, all serial numbers are tracked and an inventory log detailing data sanitization and destruction results are sent within 10 business days of a pickup.

### End-of-Life Recycling

Each and every component of end-of-life assets is recycled in an environmentally responsible way through recycling partners who hold the highest standards and certifications in e-waste recycling.

### Reporting

Detailed reporting provides an audit trail for legal compliance. We record the serial number of every computer, the employee who conducted the data sanitization of each hard drive, and the result of the sanitization process. If any hard drives can not be securely sanitized, they will be recorded and physically destroyed. A Certification of Data Sanitization will be provided.

## COMMUNITY IMPACT

### Digital Equity

Computers are refurbished and distributed back into the community with the goal of equal access to technology – vital tools for full participation in today's society.

### Workforce Development

Our recycling activities provide jobs for adults with disabilities totaling over 18,000 hours of paid valuable work experience.

### Environment

If items are not reusable, we recycle every component in an environmentally responsible way - keeping millions of pounds of e-waste out of our landfills.

## 2020 IMPACT

**37,975 computers distributed**

**2 million pounds of e-waste recycled responsibly**
